Ayers Pottery

Steve Ayers has been a professional potter for over 30 years and has been making pottery in Hannibal for 25 of those years. Ayers pottery is recognized nationwide for its beautiful form and intense color-rich glazes.

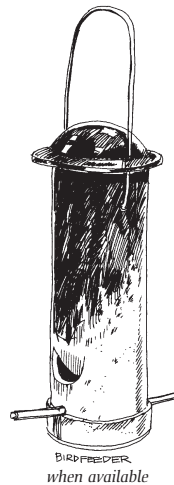

Steve makes pottery with the customer in mind, pottery that is beautiful and functional. Handles must feel comfortable, spouts must pour, pottery must be microwaveable, oven-safe, and fit in the dishwasher. All of our work is lead free and food safe.

Visit our studio and watch us make pottery. Browse in the showroom then take home a true Hannibal souvenir. If there's time, we'll show you around the shop.

Hawaii & Alaska add additional \$6.95

*Prices are subject to change.

The first thing to remember about pottery is that it is made of clay. While clay has been used since the civilization of man - it is breakable. However, we still use pottery that is 20 to 30 years old. With care and proper use, you can enjoy your pottery for years too.

Tips to help you enjoy your pottery:

- Treat pottery with care. Don't bang against granite counter-tops nor when loading dishwashers or storing in cabinets.
- The biggest pottery stressor is temperature extremes. Never put anything frozen on pottery to heat in oven or microwave! Never put cold pottery from fridge to hot oven. Always start at room temperature.
- Our pottery is microwave and oven safe, but must have food distributed evenly (and stir when microwaving). Rounded shapes, such as bowls and mugs, take stress much better than flat shapes, such as plates.

Our Promise: With proper usage, we will replace your pottery if it cracks within the first few uses. (Dropping it doesn't count.)

Finally, we still get asked about lead content. In over 30 years of working in pottery, we don't know of anyone in the U.S. using lead glazes. We mix our own glazes and would not risk contaminating ourselves, our employees, or our valuable customers.

We love our work and like talking about it. If you have other questions, please feel free to contact us - or visit our web site for more information: www.AyersPottery.com
